*“Quando for visitar seu adversário,  
fale em voz baixa, mas leve um  
grande porrete nas mãos”*

*Theodore Roosevelt*  
Presidente dos EUA de 1901 ~ 1909

# Mais do Mesmo

*"a transição da ditadura para a democracia levará tempo, mas valerá cada um de nossos esforços. Nossa coalizão permanecerá até que nosso trabalho esteja pronto"*

*George W Bush  
Presidente dos Estados Unidos da América*

# Informação

---

*"Se você contar uma mentira poderosa e a repetir continuamente, as pessoas eventualmente acreditarão em você. A mentira pode ser mantida enquanto o Estado puder evitar que o povo conheça as consequências políticas, econômicas ou militares dessa mentira. É importante, portanto, que o Estado use todos os seus poderes para reprimir a oposição, porque a verdade é inimiga mortal da mentira, e portanto, a verdade é inimiga mortal do Estado."*

*Joseph Goebbels  
Ministro de Propaganda Alemão*

# Poder e Saber

*"O poder produz saber. Poder e saber se implicam diretamente. Não há relação de poder sem a constituição correlata de um campo de saber; nem há saber que não suponha e não constitua ao mesmo tempo relações de poder."*

*"O poder é o relacionamento de forças; todo relacionamento de forças é um relacionamento de poder. Toda força, por sua vez é um relacionamento. O relacionamento de forças não é a violência; excede a violência e não se define pela violência. A violência incide sobre corpos, a força incide sobre outras forças."*

*Michel Foucault  
Filósofo e Professor*

# Rede Mundial de Computadores

---

1969 – Foi criada nos EUA, pelo **Departamento de Defesa**, a rede ARPANET (Advanced Research Projects Agency Network), com a interligação de quatro instituições de ensino.

1971 – Havia **18** pontos de acesso.

1980 – **Centenas** de computadores eram interligados pela ARPANET, inclusive **fora** dos EUA. Ainda neste ano, a rede militar foi separada, com a criação da MILNET. Surgiram também dezenas de outras redes (**CSNet**, **NSFNet**, **SATNet**, **BITNet**, **HEPNET**, etc). Com a interconexão dessas redes, surgiu o nome **INTERNET**, ou seja, a “**Rede das Redes**”.

1988 – O **LNCC** (Laboratório Nacional de Computação Científica) no **Rio de Janeiro**, conectou-se à **Universidade de Maryland** (EUA) e passou a fazer parte da rede BITNET (uma rede educacional para troca de mensagens).

1988 – A **FAPESP** (Fundação de Amparo à Pesquisa do Estado de São Paulo) conectou-se ao **FERMILAB** (Fermi National Laboratory) em **Chigado** (EUA) e passou a ter acesso às redes **HEPNET** e **BITNET**.

1989 – O **NCE-UFRH** (Núcleo de Computação Eletrônica da Universidade Federal do Rio de Janeiro conectou-se à **UCLA** (EUA) e passou a ter acesso à **BITNET**.

# Rede Mundial de Computadores

---

1989 – O **IBASE** (Instituto Brasileiro de Análises Sócio-Econômicas) conectou a sua rede **ALTERNEX** ao **IGC** (Institute for Global Communications), nos **EUA** e passou a ser o ponto de acesso à **Internet** da **APC** (Association for Progressive Communications), que interligava várias **ONGs** do mundo.

1991 – A **FAPESP** conectou-se à **Internet** e estendeu o acesso a outras instituições de **São Paulo, Rio de Janeiro, Rio Grande do Sul e Minas Gerais**.

1991 – A rede **ANSP** (Academic Network at São Paulo), conectando diversas instituições de ensino e pesquisa de **São Paulo** entre si e com a **Internet**.

1991 – O **CNPq** (Conselho Nacional de Desenvolvimento Científico e Tecnológico) criou a **RNP** (Rede Nacional de Pesquisa), iniciando o seu backbone e conectando várias instituições de ensino e pesquisa entre si e com a Internet.

1992 – A **FAPERJ** (Fundação de Amparo à Pesquisa do Estado do Rio de Janeiro) criou a **Rede Rio**, conectando diversas instituições de ensino e pesquisa do **Rio de Janeiro** entre si e com a Internet.

# Rede Mundial de Computadores

---

**1992** – O **IBASE** recebeu a missão de prover suporte às comunicações, usando computadores para a **Conferência das Nações Unidas para o Meio-Ambiente e Desenvolvimento** (UNCED), que ocorreu no **Rio de Janeiro**. O resultado, através de colaboração da **Rede Rio** e **RNP**, foi a existência de **acesso permanente à Internet**. O **IBASE** transformou-se no **primeiro provedor** de acesso à Internet no Brasil.

**1993** – O **IBASE** passou a fornecer acesso à rede de mensagens **USENET** para os **BBS** (Bulletin Board Systems).

**1994** – A **EMBRATEL** iniciou o serviço de acesso à Internet para os usuários domésticos.

**1995** – **Criação do Comitê Gestor da Internet no Brasil.**

**1996** – Surgiram diversos provedores de acesso à Internet, além de grandes portais de conteúdo e comércio eletrônico.

# Rede Mundial de Computadores

---

## ICANN

Internet Corporation for Assigned Names and Numbers

Classifica-se como entidade **sem fins lucrativos** e de **âmbito internacional**. É subordinada ao **Departamento de Comércio** dos EUA.

Inicialmente, uma entidade chamada **IANA** (Internet Assigned Numbers Authority) prestava tal serviço, **mediante contrato** com o governo dos EUA.

Hoje a **ICANN** cumpre a função da **IANA**.

# Rede Mundial de Computadores

# Governança na Internet

---

Há **questionamentos** por parte da **comunidade internacional** sobre a concentração de poder pelos **EUA** na **Governança da Internet**.

Por outro lado, a autonomia da **ICANN** perante o governo dos **EUA** sofreu um revés, em virtude da renovação de um **Memorando de Entendimento** entre a **entidade** e o **Departamento de Comércio**.

Na prática, o **Departamento de Comércio** mantém a supervisão sobre questões cruciais, como a modificação do **arquivo raiz**.

# Cúpula Mundial

---

## Cúpula Mundial da Sociedade da Informação

Proposta no **final** dos anos **90**, diante do espantoso crescimento da **Internet**.

Ao contrário de outras cúpulas das **Nações Unidas**, foi realizada em duas etapas.

Genebra (Suiça) – **Dezembro de 2003**

Túnis (Tunísia) – **Novembro 2005**

Consenso para criação de um grupo de trabalho. Deu-se o nome de **IGF** (Internet Governance Forum). São dois encontros, um em **Atenas (2006)** e outro na cidade do **Rio de Janeiro (2007)**.

O Brasil teve atuação destacada nas negociações sobre a **Governança da Internet** durante a **CMSI**. Liderou uma **aliança** com diversos países descontentes com a política norte-americana e ainda conseguiu anular a resistência de várias delegações (particularmente de governos totalitários) à **participação da sociedade civil no IGF**. Por fim, negociou uma aliança com a **União Européia** que terminou isolando os **Estados Unidos**.

# Propriedade Intelectual

## Organização Mundial da Propriedade Intelectual

**Assembléia Geral** realizada em Genebra entre **27 de Setembro e 5 de Outubro de 2004**.

Um **grupo de 14 países** liderados pelo **Brasil**, apresentou uma abrangente proposta para incluir **questões de desenvolvimento e acesso ao conhecimento** nos debates da **OMPI**.

....

Promover medidas que auxiliarão os países a lidar com práticas anti-competitivas relativas à propriedade intelectual, através do provimento de cooperação técnica aos países em desenvolvimento, especialmente os menos desenvolvidos, mediante solicitação, de forma a melhor compreender a interface entre direitos de propriedade intelectual e políticas de competição.

Explorar políticas e iniciativas relacionadas à propriedade intelectual necessárias à promoção da transferência e disseminação da tecnologia, ao benefício de países em desenvolvimento, e tomar as medidas apropriadas para possibilitar aos países em desenvolvimento que compreendam e se beneficiem de formas integral das diferentes providências, referindo-se às flexibilidades constantes dos tratados internacionais, conforme apropriado.

# Pirataria

O último **primeiro-ministro** da então poderosa **União Soviética, Michail Gorbachev**, publicou em **5 de fevereiro de 2007**, uma **carta aberta ao fundador da Microsoft**, assinada também pelo deputado **Alexander Lebedev**.

Ao destinatário, eles **pedem clemência** para o **professor Alexander Ponosov**, diretor de uma escola primária na vila rural de **Sepych**, distante mais de mil km de Moscou.

O **presidente da Rússia, Vladimir Putin, manifestou-se** em sua conferência anual de imprensa, segundo o New York Times, **contra a perseguição ao diretor**.

**Ponosov** está sendo processado pela **Promotoria Geral da Rússia**, num tribunal regional de **Vereshchaginsky**, sob acusação de ter posto em uso **sem as devidas licenças softwares** de propriedade imaterial da dita empresa, em **computadores da escola** que ele **administra em Sepych**.

A pena pode chegar a **5 anos de prisão**, em **campo de concentração na Sibéria**, mais multa superior a **US\$ 10 mil dólares** (valor das ditas licenças). A primeira audiência do "caso Ponosov" foi em 29 de janeiro, e a próxima está marcada para 12 de fevereiro.

<http://www.nytimes.com/2007/02/06/technology/06pirate.html?ex=1174363200&en=35dc534df4b8f868&ei=5070>  
<http://oglobo.globo.com/tecnologia/mat/2007/02/05/294450932.asp>

# Pirataria

Segundo **Gorbachev**, "Muitas pessoas na Rússia consideram esse caso escandaloso como um ardil, lançado por iniciativa da Microsoft para dar um exemplo. Temos grande respeito pelo trabalho dos programadores da sua empresa, e não estamos de forma nenhuma lançando dúvidas sobre a necessidade de punir quem viola propriedade intelectual. Entretanto, nesse caso pedimos que mostre piedade e retire sua queixa contra Alexander Ponosov".

05.02.2007 Михаил Горбачев, Александр Лебедев. Открытое письмо председателю корпорации "Майкрософт" г-ну Биллу Гейтсу

Уважаемый г-н Гейтс!

Вы, вероятно, знаете о громком уголовном процессе в России, в котором в качестве потерпевшей стороны выступает Ваша компания. Суть дела заключается в том, что российская прокуратура преследует учителя провинциальной средней школы Александра Поносова, который якобы умышленно использовал в компьютерном классе нелицензионное программное обеспечение фирмы «Майкрософт». Учителю, посвятившему свою жизнь воспитанию детей и получающему за свою работу весьма скромное вознаграждение, несопоставимое с доходами даже рядовых сотрудников Вашей компании, грозит тюремное заключение в сибирских лагерях.

При этом вина учителя представляется очень сомнительной — он купил для школьного класса компьютеры с уже установленным программным обеспечением, которое, как впоследствии выяснилось, было нелицензионным. Однако российский Уголовный кодекс позволяет карать даже тех, кто использует пиратскую продукцию по неведению, не подозревая о ее нелегальном происхождении. Обращает внимание, что те, кто продал Александру Поносову компьютеры с ворованным ПО, оказались вне поля зрения правоохранительных органов. Поэтому многие в России считают этот скандальный процесс заказным и показательным, затеянным по инициативе корпорации «Майкрософт».

Уважаемый г-н Гейтс! Мы с большим уважением относимся к труду программистов Microsoft, вкладывавших свой талант в интеллектуальные продукты компании, и ни в коей мере не подвергаем сомнению сам принцип ответственности за нарушение авторских прав. Однако в сложившейся ситуации мы обращаемся к Вам с просьбой проявить снисходительность и отозвать претензии к Александру Поносову. Этот благородный шаг был бы с воодушевлением воспринят всеми, кто пользуется продукцией корпорации «Майкрософт» в России.

С уважением,  
Михаил ГОРБАЧЕВ

Депутат Государственной Думы Федерального Собрания Российской Федерации  
Александр ЛЕБЕДЕВ

# Direitos Autorais

## Carta Aberta a Steve Jobs

Trata-se de um **abaixo-assinado** da **Free Software Foundation** para que **Steve Jobs** concretize em ações suas recentes declarações contra a **Gestão Digital de Direitos (DRM)**, conjunto de técnicas utilizadas para restringir o uso de cópias digitais de obras. Jobs, em seu **blogue**, reconhece que **DRM** tem **diversas consequências danosas** e clama por seu total abandono na publicação de músicas digitalizadas (e.g. mp3), mas por outro lado alega que **Apple é pressionada por gravadoras a manter DRM no iTunes**.

A **DRM** do **iTunes** foi considerada **ilegal** em **alguns países europeus**, tendo já sido condenada na **Noruega**. A carta aberta solicita que Steve Jobs comprove que suas palavras não sejam hipócritas, tomando as seguintes atitudes que estão a seu alcance:

Remover **DRM** do **iTunes** para artistas **independentes**;

Remover **DRM** do **iTunes** para filmes **Disney** e **video**;

Tomar uma posição pública contra **DRM** e **legislação** que a suporte, através do financiamento de uma campanha para repelir as proibições do **DMCA**.

# Direitos Autorais

Leis estadunideneses como o **DMCA** acabam tendo seu alcance estendido por tratados internacionais (como o **TLC EUA-Equador** que impôs ao **Equador** a legalização de patentes de software, **criminalizando os softwares livres para assistir DVDs**) e obviamente também através de lobby corporativo sobre os legisladores. Desse modo, a implementação de tais leis causa preocupação (e danos) em nível mundial.

# Liberdade de Expressão

---

Entrou em funcionamento, uma ferramenta da **versão chinesa do Google** que restringe a busca aos sites autorizados **pelo governo da China**.

O **Yahoo** forneceu **dados** ao governo Chinês do **e-mail** de um **jornalista** chinês, que depois foi **preso** por enviado por e-mail um artigo sobre censura na **China**, publicado em um site americano.

A **Microsoft** desativou um **blog** chinês que criticava o governo, hospedado no **MSN Spaces**. O responsável por ele era **Zhao Jing**, também conhecido como **Michael Anti**, que escrevia sobre fatos da atualizada e **questionava** a política do governo **chinês**.

Em uma entrevista com **IDG News Service** no **Consumer Electronics Show**, em **Las Vegas**, o **CEO** da **Microsoft** reiterou que a companhia é **obrigada a respeitar a lei local**.

Na semana passada, em **Nova York** houve um encontro entre **George W. Bush** e **Hu Jintao**, presidente da **República Popular da China** e secretário-geral do **Partido Comunista chinês**. O presidente americano **tratou muito superficialmente** o assunto dos **direitos humanos**; sua maior preocupação era outra: como convencer os chineses a **moderar as exportações, no sentido de reduzir o imenso déficit comercial dos Estados Unidos**.

# YouTube

---

Usuários relatam que não estão conseguindo mais acessar o YouTube. Na terça-feira, o Tribunal de Justiça do Estado de São Paulo determinou, por liminar, que o site norte-americano ficasse inacessível para brasileiros até que o vídeo da modelo Daniela Cicarelli e do namorado Tato Malzoni fosse removido do ar.

A justiça da Turquia ordenou o bloqueio do YouTube no país, atendendo a solicitação de um promotor público que pediu o bloqueio ao site por trazer vídeos que insultavam o fundador da Turquia moderna, Mustafa Kemal Ataturk, reportou a agência Associated Press.

Na Tailândia, o Ministro das Comunicações, Sitthichai Pookaiyaudom, disse à Reuters que ele ordenou o bloqueio de todo o site no país depois das tentativas do ministério para a retirada do vídeo na semana passada.

Criticar ou ofender a realeza é crime na Tailândia. Aqueles considerados culpados podem ser condenados a até 15 anos de prisão. Na semana passada, um suíço foi sentenciado a 10 anos de prisão por alterar imagens do rei, em uma rara condenação de estrangeiro no país.

# Google e Privacidade

O calendário para a **WEB** foi lançado em **2006**. Parecido com outros calendários de desktop, o **Google Calendar** permite que os usuários armazenem informações de eventos e contatos, entre outros dados. O **Google mantém a informação online**, que pode ser acessada através de qualquer computador conectado à Internet. Os usuários podem optar por manter seus compromissos particulares - a opção padrão - ou permitir buscas públicas da informação.

As informações obtidas por tais pesquisas não são restritas a dados pessoais. Até alguns calendários corporativos podem ser encontrados no **Google Calendar**, onde estão datas de encontros, nomes de projetos e informações de conferências internas.

**Ray Everett-Church, chief privacy officer da empresa antispam TurnTide**, não está preocupado com varredura computadorizada de e-mail do Gmail porque os usuários recebem um aviso claro e porque o **Google não retém ou compartilha dados que vinculam informações direcionadas a anúncios a indivíduos**. Segundo Sarah Milstein, editora e escritora que testou o Gmail, “não é diferente de provedores de internet e empregadores que fazem varreduras contra spam... Não existe evidência de que o Google faça alguma coisa mais invasiva do que outros fornecedores de e-mail”

# Google Earth

---

O **Google Earth** viola gravemente o direito da personalidade e pode ser obrigado a pagar indenização de até R\$ 100 mil **por exibir corpos nus em seus mapas**. A afirmação é de Gustavo Nicolau, advogado e professor de Direito Civil no Complexo Jurídico Damásio de Jesus, localizado em São Paulo.

**Terroristas em Basra, Iraque**, estão transformando o **Google Earth** em uma ferramenta para planejar ataques, segundo o **Exército Britânico**.

Documentos encontrados nas casas de suspeitos de terrorismo **continham imagens captadas pela ferramenta do Google** contendo anotações, entre outras localidades, de um acampamento do **Exército Britânico**. Recentemente um soldado foi morto e diversos foram feridos em um ataque no local.

Para exércitos regulares, no entanto, o sistema não oferece nenhuma vantagem, pois esses grupos **já dispõem de seus próprios serviços de imagem por satélite**.

# Revolução dos BLOGS

---

Antes de ser considerado um impacto violento na comunicação, colocando em xeque práticas jornalísticas consagradas, um blog é, antes de tudo, relacionamento.

Assim que você abre as portas para receber gente desconhecida, mas interessada em conversar sobre seus assuntos preferidos, a coisa flui naturalmente.

Democratização da Informação.

Junto com equipamentos portáteis e tecnologias de transmissão de dados, é uma poderosa ferramenta para gerar conteúdo independente.

Exposição variada de idéias.

Pode ter finalidades nocivas à cultura contemporânea.

# One Laptop per Child

O produto deve ter processador de 500 MHz da AMD, memória flash, software livre e tecnologia Wi-Fi (para acesso sem fio à internet). Entre os parceiros do projeto estão AMD, Google, Brightstar, News Corporation, Nortel e Red Hat.

Uma das características do computador é uma manivela que fornece energia em caso de falta de eletricidade --cada minuto de movimento manual garante dez minutos de funcionamento. O PC também será protegido por uma capa de borracha porque precisa ser "totalmente indestrutível", já que seu público-alvo é formado por jovens estudantes.

# Second Life

---

A Suécia pretende ser o **primeiro país** a abrir uma **embaixada no popular mundo virtual Second Life**. "O órgão oferecerá **respostas a perguntas sobre todos os aspectos da Suécia**", afirmou na terça-feira Olle Wastberg, diretor-geral do Instituto Sueco, uma organização que divulga a imagem do país no exterior.

A embaixada se chamará **Casa da Suécia** e será **inspirada no prédio da embaixada sueca em Washington**. O órgão virtual deve ser inaugurado dentro de algumas semanas.

O fato é que a **TAM**, instalada na **Ilha Berrini**, vai agilizar o acesso às regiões de **Milão, Paris, Inglaterra e Nova York**. Utilizando as “linhas” da TAM o usuário fará parte de um **“programa de fidelidade”** e juntará pontos, com estes pontos você poderá comprar de **aviões movidos a gás hélio até roupas e modelos variados**.

Internautas ligados ao **Exército da Libertação do Second Life** (SLLA, na sigla em inglês) iniciaram há cerca de seis meses uma **onda de ataques terroristas no programa on-line Second Life**, que reúne cerca de 4 milhões de membros cadastrados. Avatares (personagens) desse grupo **criaram uma maneira de simular bombas que vêm sendo usadas em seus manifestos, divulgou a agência de notícias France Presse**.

# Second Life

---

Os **usuários do Second Life** realizam transações com o **dinheiro virtual**, via boleto bancário (com a moeda de cada país, no mundo off-line) ou via cartão de crédito internacional -- **esta última alternativa possibilita a conversão de dólares dos Estados Unidos em lindens**. Por enquanto, ainda não é possível comprar oficialmente o dinheiro do Second Life com reais (R\$) ou outras moedas.
